PROFESSIONAL SUMMARY

Computer Science undergraduate student with hands-on experience in Python, Java, C and C++. Built backend systems and data pipelines processing 50,000+ records, applying core Computer Science fundamentals, Data Structure & Algorithms, Object Oriented Programming concepts and Database Management to deliver scalable and reliable working model. Strong problem-solver and fast-learner, looking to contribute to a large-scale engineering team.

EDUCATION

1. SRM Institute of Science and Technology (Chennai)
Bachelors of Technology - Computer Science

2023-2027
CGPA 8.9/10

SKILLS

CS Fundamentals: Data Structures & Algorithms, OOP, OS, DBMS

Languages: Python, Java, C++, C

Backend & Systems: REST APIs, Flask, Node.js

Databases: MySQL, MongoDB

Tools: Generative AI, Prompt Engineering, Git,

PROJECTS

1. Opinion Mining for Social Media Network

March 2026

Tech Stack: Python, NLP, Machine Learning, REST APIs, Flask, Pandas, Scikit-learn

Built and optimized an NLP pipeline for sentiment classification on 20k+ records using TF-IDF and supervised learning, improving classification accuracy.

Designed data pipelines for collecting, preprocessing, and structuring unstructured text data using Python and APIs.

Designed the system architecture and API layer connecting the ML model to the data pipeline.

2. AI Stock Market Prediction

Jan-2026

Tech Stack: Python, LSTM/GRU, NLP, APIs, Flask, DBMS

Designed and implemented a scalable backend system to process 50k+ financial records using Python and REST APIs, optimizing data ingestion and reducing processing latency.

Designed and implemented modular ETL pipelines for ingestion, transformation, and storage of large-scale financial datasets (50k+ records), improving data processing efficiency and system reliability.

Integrated NLP-based sentiment signals to enhance predictive confidence and support market risk analysis and reporting insights.

CERTIFICATIONS

1. Programming Fundamentals - Java (PwC)

June 2026

2. Cyber, Data and Tech Risks (PwC)

June 2026

3. Generative AI (PwC)

May 2026

4. Modern Data System (PwC)

Apr 2026

LANGUAGES

English, Hindi, French, Italian

VOLUNTEERING & LEADERSHIP

1. Technical Trainer – Ek Koshish Aisi Bhi NGO

June 2025 - July2025

Delivered digital literacy training to 30+ underprivileged students.

Developed inclusive tech-learning modules and hands-on sessions.

2. International Delegation Programs

Commonwealth Youth Delegate: India- Singapore

Feb 2025

Immersion Program: India-UAE

Sep 2024

Commonwealth Youth Delegate: India – Malaysia

March 2024

CONFERENCES & ACHIEVEMENTS

1. Leet Code

Solved 200+ problems on Leetcode focussing on DSA and problem-solving patterns.

2. ChatGPT Prompt Engineering Mechanica'25

Feb 2025

Technobytes Technologies · IIT Madras

Learned prompt design, refinement, and output optimization techniques.

Understood neural networks, activation functions, and predictive analysis fundamentals.

3. Indian Debating League

Jan 2023

DebSoc – IIT Delhi

Awarded Runner-Up in the Debate, reflecting exceptional public speaking, high-pressure decision-making, and the ability to present complex ideas with precision and confidence.
